WEBSITE HANDOVER & EDITING GUIDE

Keeping your website up to date.

A plain-language guide for the team. No coding, no technical skills — just log in, change the words or photos, and click Publish.

You never touch code. The site updates itself.

This website updates itself when you edit content. You **log in**, change words, numbers or photos, click **Publish**, and the live site updates on its own in about **1-2 minutes**. Nothing in this guide can break the site — if a field is left blank, the original wording simply stays.

1 Logging in

- 1 Go to sivulingqondo.netlify.app/admin/ — or sivulingqondo.org.za/admin/ once the domain is connected.
- 2 Click **Login with GitHub** and approve.

The login screen at /admin — one click, then approve on GitHub.

Can't get in?

You need a GitHub account that has been invited to the project. If login says you don't have access, ask the **site administrator** to invite you.

2 How editing works — the golden rules

- ◆ Find the section in the left-hand menu, click it, change the field, click **Publish**.
- ◆ Changes go live in **1-2 minutes**. If you don't see them, wait and refresh.
- ◆ You can leave most fields blank — the site keeps its original wording and **nothing breaks**.
- ◆ **Photos:** use clear, landscape (wide) photos where possible, and keep captions short.
- ◆ When in doubt, change **one thing**, publish, and check the live site before doing more.

3

The menu — what each section controls

When you log in, everything is organised into three groups in the left-hand menu.

The screenshot shows the admin interface for Sivulingqondo. The browser address bar displays `sivulingqondo.netlify.app/admin/`. The interface has a header with the Sivulingqondo logo and a 'Quick add' button. The left-hand menu is divided into three sections: SITE, PAGES, and COLLECTIONS. The 'SITE' section is active, showing 'Site & Campaign Settings' as the selected item. The main content area is titled 'Site & Campaign Settings' and 'Global Settings'. It contains three form fields: 'Organisation name' (filled with 'Sivulingqondo Community Project & ECD'), 'Amount raised so far (Rand)' (filled with '0'), and 'Footer note' (filled with 'A small line shown at the bottom of every page...').

The editor: the left menu (the three groups) and the fields you change on the right.

- **Site & Campaign Settings** — shared things across the whole site (donation total, contact details, partners).
- **Page Content** — the words and photos for each individual page.
- **Collections** — lists you grow over time (programmes, team, gallery, purchases). Use **Quick add** or open one and click **New**.

● Site & Campaign Settings

The shared things that appear across the whole site.

- **Organisation details** — name, tagline, phone, WhatsApp number, email, address
- **WhatsApp pre-filled message** — the text that appears when someone taps the green WhatsApp button
- **Facebook / ForGood links** and **NPO / PBO numbers**
- **Footer note** — the small line at the very bottom of every page
- **Partners & funders** — the names in the logo strip (add/remove freely)
- **Programme ticker** — the scrolling strip of programme names on the home page
- **Campaign** — the **amount raised so far** (donation bar), the goal, budget line items, and impact tiers (e.g. R350 = a chair)
- **Impact stats** — the three big numbers (children in ECD, programmes, years)

● Page Content

The words and photos for each page. Each page is its own screen.

- **Home Page** — hero headline & intro, the 4 hero photos, campaign card text, section headings, the story & quote, transparency text, and the get-involved band
- **About Page** — Story, Mission, Team and Transparency text
- **Campaign Page** — the appeal paragraph, headings, and the "before any purchases" text
- **Get Involved Page** — the four cards (add/remove/edit title, text, button)
- **Contact Page** — heading and the form button label

● Collections — add as many as you like

Lists you grow over time. Click **New** to add an item.

- **Programmes (Focus Areas)** — title, summary, photo, and an emoji icon
- **Team Members** — name, role, photo
- **Gallery Photos** — a photo with a caption and (optionally) the programme it belongs to
- **Transparency Wall** — "what we bought" proof: title, photo, an optional tag (e.g. "Weekly"), an invoice link, and a date

4 The most common tasks

Here's the most common one done in full — every task follows the same rhythm: **open** → **change a field** → **Publish**.

The screenshot shows the Sivulingqondo admin interface. The browser address bar displays `sivulingqondo.netlify.app/admin/`. The Sivulingqondo logo is in the top left, and a **Publish** button is in the top right. The left sidebar contains a menu with 'SITE' (Site & Campaign Settings), 'PAGES' (Page Content), and 'COLLECTIONS' (Gallery Photos, Transparency Wall). The main content area shows the 'Campaign' settings page, with a breadcrumb trail: 'Site & Campaign Settings > Global Settings > Campaign'. The 'Campaign' section includes a 'Goal (Rand)' field with the value '16500', an 'Amount raised so far (Rand)' field with the value '4 200' (highlighted with an orange border), and a 'Title' field with the value 'Tables, Chairs & a Safety Mat'.

Type the new total in **Amount raised so far**, then click **Publish** (top-right).

WHAT VISITORS SEE (LIVE)

WHAT YOU CHANGE

R4

200

typed
into the
field

And the rest — all the same three steps:

**Update the donation total**

Site & Campaign Settings → Campaign
→ Amount raised so far → type the new
number → **Publish**

**Add a gallery photo**

Gallery Photos → New → upload the
image, add a caption → **Publish**

**Post proof of a purchase**

Transparency Wall → New → title (e.g.
"15 chairs delivered"), photo, invoice link →
Publish

**Change a headline or hero photo**

Page Content → Home Page → Hero
→ edit the headline or replace a photo →
Publish

**Add or edit a programme**

Programmes → pick one, or New →
title, summary, photo, emoji → **Publish**

**Add a team member**

Team Members → New → name, role,
photo → **Publish**

5**Formatting text (bold & links)**

Some longer text boxes — Story, Mission, the Campaign appeal — support simple formatting. Plain typing is completely fine; formatting is optional.

****two stars**** → makes text **bold like this**

[text to show](https://the-link.co.za) → makes a clickable **link**

Leave a **blank line** between paragraphs to start a new paragraph.

6**If something looks wrong****You can't permanently break a page.**

Empty fields fall back to the original wording, so it's safe to experiment.

- ◆ Wait **2 minutes** and refresh — it may still be publishing.
- ◆ If a field looks broken, **clear it and re-type**, then Publish.
- ◆ For anything you can't fix from the editor, **contact the site administrator**.

7 Administrator & account access

For the site administrator only — how the accounts fit together.

GitHub (project owner) `mbaresponsiblecitz-cpu` — owns the website's repository.

Sign-in method The GitHub account is signed in via a **Google account**.

Hosting The **Netlify** account is linked to the GitHub account (hosting + auto-deploy).

The editor (/admin) Logs in through GitHub (GitHub OAuth).

⚠ Where are the email & password?

Login credentials are **not stored in this guide or in the repository** — the repository is public, so secrets must never be committed to it. The account email and password are kept securely in a password manager / private document. **Ask the site administrator** for access.

Security reminders

- Keep the email/password in a **password manager** (e.g. Bitwarden, 1Password) or a **private** document shared only with people who need it.
- **Never** paste passwords into the repository, the website, issues, or commits.
- Turn on **2-factor authentication** on the Google and GitHub accounts.
- **Rotate the password** if it has ever been shared in plain text.
